

Renewable Energy Developments

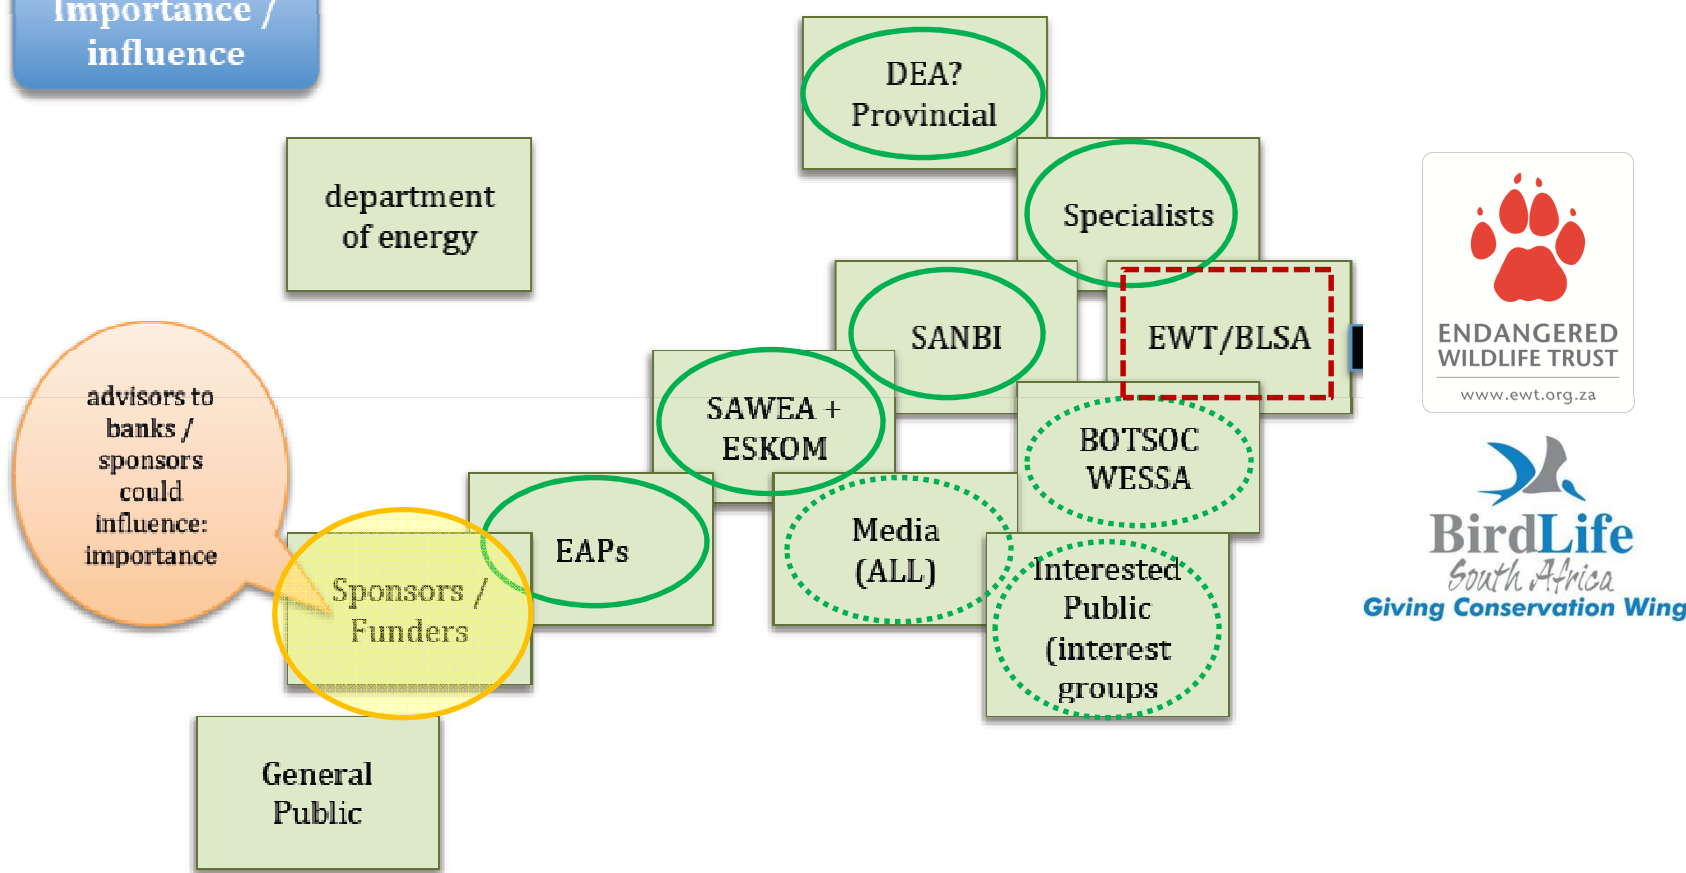

Stakeholder Engagement

Stakeholder Map

(January 2012)

Importance /
influence

advisors to banks / sponsors could influence: importance

Interest

Department of Environmental Affairs

- Presentations to the relevant departments
- Development of a terms of reference for avifaunal impact assessment of wind energy facilities
- Development of recommended conditions of approval
- Appeals against environmental authorizations (where necessary)

Industry: South African Wind Energy Association

- Initial engagement with the SAWEA President
- Presentations to the association members at relevant conferences
- SAWEA Environmental Task Group
- SAWEA endorsement of the monitoring guidelines and avian sensitivity map
- Members have commented on other tools
- Ongoing informal liaison

South African Wind Energy Association
www.sawea.org.za

Industry: Eskom

- Early stages of engagement – limited involvement in renewables
- Endorsement of the monitoring guidelines and avian sensitivity map
- Ongoing informal liaison through BirdLife SA and EWT partnerships
- Opportunities for strategic input and research
- Important role to play as purchasers of the power
- Lesotho

Industry: **South African Photovoltaic Industry Association**

Limited engagement with the association to date
Opportunities for strategic input

Environmental Practitioners: International Association of Impact Assessors

**Discussions with the association have
been limited to date**

Resistance from some EAP's

**BLSA & EWT presentations at the
recent IAIA Conference**

**Possible endorsement of the
monitoring guidelines and avian
sensitivity map**

Project Financiers

Limited discussions with local
South African Banks

Perhaps have the most
influence

Encourage best practice

Opportunity to minimize
financial risk

Thank you
