**Comments from the United States--Private Sector Set-Aside: Honduran Self Supply
Renewable Energy Guarantee Program (IDB) (SREP)**

Honduras projects:

- Has IDB considered a model where it would be working directly through commercial banks to support their entry into the energy efficiency/ RE market?
- How does the efficiency of CTF funds compare to other financing mobilized compare to other CTF supported energy efficiency programs in other regions?

Thank you,

Abby Demopoulos
