Comments from United Kingdom on Brazil: Forest Information to Support Public and Private Sectors in Management Initiatives (IDB)

Dear CIF Admin Unit Colleagues,

Thank you for sharing with us this FIP project from Brazil, for consideration, although was this after the moratorium?

We hope you can assist us?

We wonder if other colleagues have also struggled to access some of the documents referred to in the main project document? Social, environmental appraisals, theory of change, operational manuals and additional annexes are linked to IDB hosted documents, that require password access.

Is this a departure from other FIP project models? Without access to these additional documents, it is difficult for us to fully assess this project. Currently we are struggling to obtain this access.

We would be grateful for your guidance, as to whether yes, we do indeed need to create special access to these materials, on the IDB secure website?

Warmest thanks for your guidance.

Sincerely,

Gemma May | Climate & Environment Adviser | Climate & Environment Department |
Department for International Development
