

Meeting of PPCR Pilot Countries
World Bank J Building, Room B1-080
Washington, DC, United States
May 1 - 3, 2013

Agenda

Wednesday, May 1, 2013

2:00 pm *Opening and Introduction*

2:30 pm - 6:30 pm *Updates from Pilot Countries and Regional Organizations*

With most PPCR pilots well into the implementation of their SPCRs, this session will provide a space for countries and regional organizations to update each other on the progress they are making and challenges they face in implementing a programmatic approach to enhancing climate resilient development. (Note: Countries will be requested to prepare updates in advance of the meeting using a template prepared by the CIF Administrative Unit.) Updates will be shared in facilitated table discussions, followed by a reporting back in plenary format where representatives will highlight lessons learned and discuss how they can be built upon.

Thursday, May 2, 2013

9:00 am – 12:30 pm *PPCR Monitoring and Reporting – Part I*

PPCR pilots will have prepared first draft monitoring and reporting work plans and are expected to establish baselines and targets for core indicators by August 2013. This session provides an opportunity to address practical issues related to the PPCR revised results framework and M&E deliverables. The session will begin with a “nuts and bolts” presentation by the CIF AU Senior Monitoring and Evaluation Specialist on the PPCR revised results framework, including work plans, core indicators, and national monitoring and reporting systems. The presentation will be followed by a question and answer session during which countries and regional institutions are encouraged to raise any questions and share their experiences in developing monitoring and reporting work plans. During the second part of the session, participants will move into table discussions to peer review their monitoring and reporting work plans. Each group will briefly report the key findings from their peer review and discuss and agree on what a good work plan for PPCR monitoring and reporting should look like.

1:00 pm – 2:00 pm *Presentation by the Government of Belize*

The Government of Belize is working with the World Bank to develop a comprehensive cross-sectoral climate resilience investment plan, which would follow a similar programming process as suggested by the PPCR to develop an SPCR. The preparation of Belize’s investment plan is supported through funding from the Global Facility for Disaster Reduction and Recovery

(GFDRR) and the European Union. The Government of Belize has requested the opportunity to share its work to date in preparing its plan and seek advice and feedback from PPCR pilot countries.

2:00 pm – 5:00 pm *Maintaining the Programmatic Approach: Country Coordination*

Effective country coordination among the multiple government agencies, MDBs and external stakeholders involved in the implementation of SPCRs is crucial for maintaining the PPCR programmatic approach. Practitioners from outside the CIF are looking to the PPCR for lessons on how national coordination is working in practice. This session will be divided into two parts to discuss two key elements for successfully implementing SPCRs: institutional coordination and stakeholder engagement. The common objective of this session will be for countries to generate recommendations (and share lessons on what doesn't work) – for PPCR pilots and beyond – on how to maintain effective country (or regional) coordination and stakeholder engagement through a strategic planning process and into program and project implementation.

Part I: Country and Regional Coordination Mechanisms

Pilots have adopted several different models for SPCR program coordination. Part I of this session will delve into how different models for coordination are functioning in practice in managing interagency coordination, engagement with stakeholders, sharing lessons, measuring and reporting results, and mainstreaming climate resilience. Caribbean Community Climate Change Centre, Niger, and Saint Vincent & the Grenadines will be invited to share their models for institutional coordination and how they are working in practice. Participants will engage in a dialogue to identify factors for success (and challenges) in coordination models, potential for replication, and sustainability.

Part II: Stakeholder Engagement

PPCR pilots have highlighted the importance of generating consensus among stakeholders in the preparation of SPCRs, and several have identified stakeholder interest and ownership as important determinants of success for fast-moving projects within their SPCRs.¹ CIF Stakeholder Relations officer will open this session by presenting CIF stakeholder engagement principles, approaches, and stakeholder roles. Samoa and Zambia will then share their experiences engaging stakeholders through information sharing, consultation, and partnership in the contexts of their SPCRs and projects. Participants will engage in a dialogue with the aim of identifying good practices and avoiding pitfalls in their approaches to stakeholder engagement.

Friday, May 3, 2013

9:00 am – 12:00 pm *PPCR Monitoring and Reporting – Part II*

The main part of the session will focus on the core indicator guidance sheets and tools for monitoring and reporting. The CIF Administrative Unit staff will introduce each core indicator and provide information on content and context and explain how and why the guidance and the

¹ Based on an analysis of updates prepared by PPCR pilots for the October 2012 PPCR pilot country meeting in Istanbul. Updates are posted online at <https://www.climateinvestmentfunds.org/cif/content/ppcr-pilot-country-meeting-october-30-2012>

scorecards have been developed in this particular shape and form. Thereafter the countries will break into groups to “road test” the core indicator guidance sheets and score cards, which have been developed by the CIF Administrative Unit to support countries in measuring and reporting country-level PPCR results. The CIF Administrative Unit team will use the feedback from this “road test” to improve the core indicator guidance sheet and score card.

1:00 pm – 2:00 pm *PPCR Learning Activities for FY 2014*

Based on feedback from PPCR pilot countries, regional institutions and MDBs, the CIF Global Support Program is proposing the theme of hydromet and climate services as a PPCR learning priority for the CIF fiscal year 2014. The CIF Global Support Program Coordinator will introduce and lead a brief discussion soliciting feedback from pilots on PPCR learning activities for the remainder of 2013 and the first half of 2014, including a proposed PPCR practitioner meeting on the theme of hydromet services in August 2013.

2:00 pm – 3:30 pm *Private Sector Action on Climate-Resilient Development*

This session aims to familiarize pilot countries and regional pilots with the diversity of ways in which the activities and actions of private companies can contribute to broader national goals to enhance climate resilience. The session will include a presentation by EBRD and IFC highlighting several typologies of activities that businesses and enterprises are pursuing with support from MDBs in middle-income countries outside of the PPCR. Early findings from Nepal’s Climate Resilient Agriculture Project, the first MDB-approved private sector project in the PPCR portfolio, will also be shared.

3:30 pm – 4:30 pm *Engaging the Private Sector through a Competitive Set Aside under the PPCR*

In November 2012, the PPCR Sub-Committee approved the allocation of funds, through a competitive process, to additional programs and projects that that promote innovative approaches to engage the private sector in PPCR pilots. The CIF AU Senior Program Coordinator will provide an overview of the procedures for accessing the competitive set aside, answer questions, and facilitate a dialogue with PPCR countries and regional institutions on additional ideas for the competitive set-aside.

4:30 pm – 5:00 pm *Reflections and Wrap up*
