PILOT PROGRAM FOR CLIMATE RESILIENCE (PPCR)

Comparing pledged resources (USD M) to funds financing adaptation

The largest active source of finance for adaptation & the only fund to provide significant resources to help countries develop and implement a programmatic approach through both planning and investment

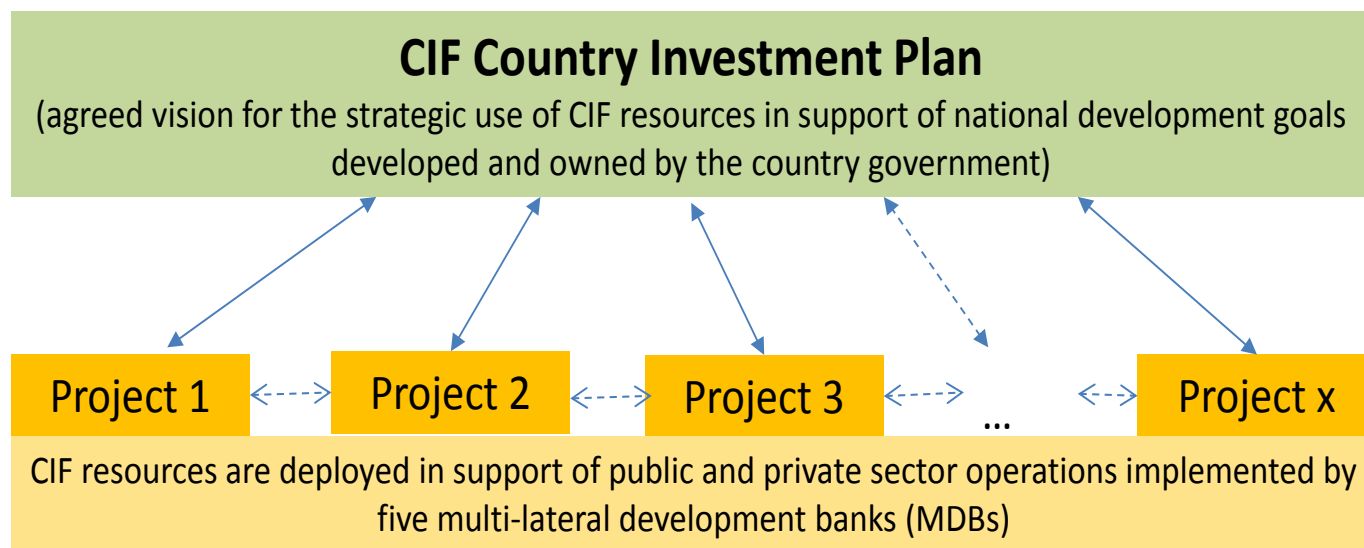

PPCR Programmatic Approach

Objective: to initiate transformational change in sectors of the economy impacting or being impacted by climate variability and change; and to enhance the ability of civil society to respond effectively to a changing climate in the context of securing their livelihood base. Includes analysis of climate risks, institutional analysis, knowledge and awareness raising, capacity building, and consultation process.

The PPCR programmatic approach is composed of two-levels, forming a country program:

Joint Mission

Preparation of Investment Plan (IP)

Endorsement of IP by Sub-Committee (SC)

Preparation of Projects under IP

CIF funding approval for projects by SC

MDB approval of project

Implementation (incl. M&E)

Supporting climate resilience across sectors

PILOT PROGRAM FOR CLIMATE RESILIENCE (PPCR)

PPCR Portfolio overview

The PPCR funds *technical assistance and investments* to support countries' efforts to *integrate climate risk and resilience into core development planning* and implementation. It provides incentives for scaled-up action and *initiates transformational change* by catalyzing a shift from “business as usual” to broad-based strategies for *achieving climate resilience at the country level*.

- ✓ 2013: **Belize** and the World Bank embarked on an extensive project identification and prioritization process to develop a national climate resilience plan based on the PPCR
- ✓ Belize presented and received feedback at the Pilot Countries Meeting in 2013
- ✓ In 2014 the World Bank announced that 24 IDA countries will adopt the PPCR model and create their own country-led multi-sectoral plans to manage climate and disaster risk in development
