

# Stakeholder Engagement Introduction

CIF

National and regional efforts towards a climate resilient and growth-oriented development require

- that all relevant stakeholders work towards one common national or regional vision
- a national coordination mechanism that responds to needs of various stakeholder groups
- an inclusive, participatory and gender-oriented approach
- that vulnerable groups receive special attention
- a partnership between the public and the private sector
- a partnership between the country and development partners

How have you approached the private sector in the design process of your SPCR?

How have the needs of civil society and the vulnerable groups been reflected in your SPCRs and how will they be involved in the implementation?
