Global Support Program for PPCR

Kanta Kumari Rigaud
CIF Admin Unit

First Meeting of the Pilot Countries
Washington DC
October 26-27, 2009

CIF Program Design
Learning and Knowledge Management

❑ Agreed CIF design documents stress the importance of establishing effective systems for the sharing of lessons as a critical part of the overall CIF mission and the sunset feature of the funds.
  ▪ KM for successful implementation of activities
  ▪ As strategy for multiplying impacts through effective sharing of lessons
❑ PPCR objectives are:
  ▪ Pilot and demonstrate approaches for integration of climate risk and climate resilience into development policies and planning
  ▪ Strengthen capacities at the national levels to integrated climate resilience into development planning
  ▪ Scale-up and leverage climate resilient investment, building on other ongoing initiatives
  ▪ Enable learning *learning by doing* and sharing of lessons at country, regional and global levels.
❑ To achieve the PPCR's central learning objective, program implementation needs to capture lessons continuously from start to end, at individual pilot and at PPCR program level
❑ At program level: dedicated resources to be allocate to ensure that KM is fully integrated into the 11 pilots through a Global Support Program
❑ Initial focus of the GSP on PPCR, but will encompass the FIP and SREP as they become operational.

Climate Investment Funds

Clean Technology Fund

Finance scaled-up demonstration, deployment and transfer of <u>low carbon technologies</u>

Country Investment Plans

- Support countries' development strategies
- Leverage financial products of International Financial Institutions
- Stimulate private sector engagement

±$5 billion

Strategic Climate Fund

<u>Targeted programs</u> with dedicated funding to pilot new approaches with potential for scaling up

Pilot Program for Climate Resilience	Forest Investment Program	Scaling Up Renewable Energy in Low Income Countries
Mainstream climate resilience into core development planning	Reduce emissions from deforestation and forest degradation	Begin transformational change by use of renewable energy
		Design finalized

±$1 billion

3

Global Support Program

❑The CIF Admin will establish a Global Support Program to

- Provide the "glue" to bring together all the individual pilots programs and promote learning among them
- Facilitate learning across pilots
- Serve as a "help desk"
- Disseminate lessons among broad range of stakeholder
- Interacting with and ensure that lessons are transmitted regularly to UNFCCC, Adaptation Fund Board, etc.

❑PPCR Pilot level

- The SPCR should include, and budget for KM

Global Support Program

❑ Key elements
   ❑ To ensure that lessons are captured within each pilot
   ❑ and disseminated across the pilots
   ❑ to whole range of stakeholders
   ❑ at global and regional levels
   ❑ shared knowledge products,
   ❑ cost effectiveness
   ❑ providing expertise and tools to participating countries

❑ All of these elements need to be embedded in the targeted program (e.g. PPCR) from the start

Never too early

Tools and Approaches for GSP

❑ Functional website for each program
- under the CIF platform

❑ Annual meeting of pilot countries
- Including the Annual partnership forum

❑ Targeted products

❑ Tools and knowledge resources, including through "living" and evolving "sourcebooks" for each program

❑ Promote robust results measurement and performance (project/program)

❑ Collaborate with and build synergies with existing learning and knowledge platforms of MDB and other development partners
- e.g. Adaptation learning mechanism, Communities of Practice, GDLN

❑ Communicate lessons to existing and emerging financing sources
- e.g. Adaptation Fund, GEF, UNFCCC

❑ Technical support
- e.g. training of trainers, media training, south-south exchanges

Target audiences

- Diverse set of stakeholder
  - Need for customized products
  - Communicating experiences and lessons
  - Need clear objectives, modalities and timing
- Stakeholders
  - Government – local scale-up
  - NGOs and civil society
  - Private sectors
  - Global environment conventions
- Dissemination and Implementation (as outreach)

Key next steps for GSP

1. Develop the scope, work program & budget
2. Develop tools and knowledge resources to support the pilot countries
3. Provide both support and quality control to the country and regional pilots to ensure effective incorporation of knowledge management in each pilot
4. Capture and promote exchange of lessons and expertise across and among the pilot programs
5. Contribute to promoting robust measurement of results through use of performance frameworks for the pilots

Tools for Country/Regional pilot

❑Invite you to think about how you can benefit, contribute and learn through the GSP

❑Build it into your program – phase I of PPCR (SPCR) and in specific investments
