**Approval by mail: Colombia: Efficient Energy Demand Management in Non-Interconnected Zones- San Andres, San Andres, Providencia and Santa Catalina Archipelago Pilot Program (CTF) (IDB)-  
Response from the UK**

Mafalda,

Thank you to the project team for their responses to our questions. The UK is now happy to approve this proposal. However, we expect the project team to work to maximise the wider influence of the project through proactively sharing learning and encouraging replication in Colombia or elsewhere, if successful.

Kind regards,  
Kate
