

Monitoring, Evaluation, and Learning (MEL) Policy and Guidance

Sandra Romboli and Neha Sharma

January 2022

Purpose

- Define, guide, and strengthen CIF-wide approach to MEL
- Enhance results management, accountability, and learning across CIF
- Clarify roles and responsibilities
- Strengthen synergies and complementarities of MEL functions

Guiding Principles

12 principles
 established
 to guide
 CIF's MEL approach

CIF MEL PRINCIPLES						
Integrated MEL Approach	Multi- Stakeholder Engagement	Gender and Social Inclusion	Timeliness and Cost- Effectiveness			
Programmatic MEL with Country Ownership	Applied Learning	Climate and Development Alignment	Ethical Execution			
MDB Harmonization	Inclusive Transforma- tional Change	Innovation	Transparency			

Monitoring Function

- Approach is anchored in programmatic M&R systems with annual results reporting
- Emphasizes both accountability and learning
- Shares a common framework of key elements + program-specific features
- Complementary roles of MDBs and countries

BROADER ENERGY ACCESS FOR 10 MILLION PEOPLE

Monitoring Function Cont.

- Enhanced results analytics
- Tailored nonprogrammatic approaches
- Capacity-building, training support, and country engagement on monitoring

EXAMPLES:

- SDG Alignment
- Social Economic Impact Co-benefit Modelling
- ClimateDelivery InitiativeStudies
- Real-time monitoring
- DIME Impact Evaluations
- Geographic, thematic, and sectoral analyses

Monitoring Function Cont.

- Newer features of CIF monitoring incorporated
 - Integrated Results
 Frameworks (IRFs)
 - CIF impact indicators
 - National proxy reporting
- Minimum requirements and guidance formalized

Evaluation Function

- Systemic and rigorous assessment of programs, projects and policies
- Approach unique amongst climate funds
 - Focus on accountability and applied learning
 - Internal evaluative studies and independent evaluations
 - Guided by an Advisory Group
- Development of Strategic Business Plans and Annual Work Plans

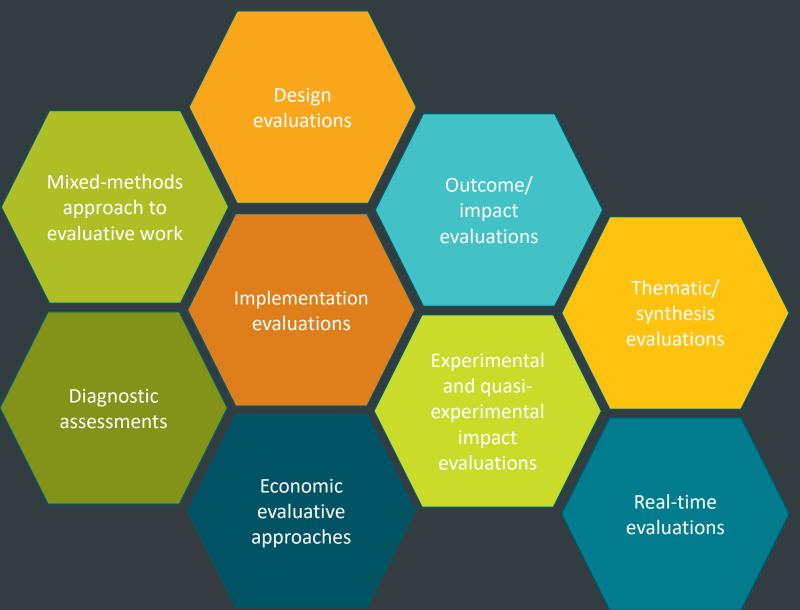

Evaluation Approaches and Methods

- Understand what works, where, why, and for which stakeholders; recognizes complexity
- Complements
 evaluative activities
 of MDBs

Evaluation Contd.

Current Priority Themes:

- Transformational change
- Development impacts of climate finance
- Just transitions
- Mobilization of private-sector finance
- Local stakeholder engagement and gender
- Program- and sector-specific priorities

Modalities to conduct evaluative studies

- Commissioning of independent evaluation firms and/or individuals
- CIF Administrative Unit-led evaluative studies;
- CIF partner-led studies (including from MDBs and recipient countries)

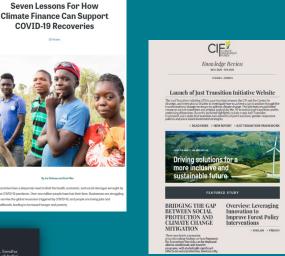

Learning Function

- Central to CIF's role as a learning laboratory for scaled climate finance
- >Monitoring and **Evaluation functions** enable learning
- ➤ Aims to improve program and project design, management, implementation, and impacts

Approach to Learning

- Use of variety of learning tools, approaches, and mechanisms
- In line with MEL principles, such inclusion and demand-driven
- Ensuring broad and targeted audiences able to access and use outputs of CIF's MEL work

KNOWLEDGE EXCHANGE

- South-South learning platforms
- Cross-climate fund and joint-IFI platforms
- Innovative exhibitions and experiential learning
- Participation in partner events

APPLIED LEARNING

- Facilitated learning partnerships
- Training and capacity building
- Real-time learning
- Workshops (virtual or in person)
- Webinars

LEARNING OUTPUTS

- Targeted analytics and/or studies
- Delivery case studies
- Learning resources and databases
- Knowledge newsletters

In conclusion...

Monitoring, evaluation, and learning are interrelated functions within CIF, supportive of programmatic accountability and learning.

CIF Theory of Change

Sandra Romboli

January 2022

CIF Theory Of Change

Purpose

- CIF's first Theory of Change
- Comprehensive update to the 2010 CIF Logic Model and program logic models for CTF, SREP, PPCR, and FIP
- "Theoretical blueprint" unifying current, new, and future CIF programming
- Also covers nonprogrammatic aspects of CIF

Concepts and Diagram

- Follows the traditional M&E approach of:
 - Inputs → Activities → Outputs → Outcomes → Impacts → CIF Impact
- Text version and diagram version
- CIF impact statement combines primary climate objectives (net-zero emissions, resilience) with complex systems change (inclusive transformational change)
- Color-coded impact pathways help organize and simplify the model
- Assumptions, barriers, and risks guide the model both upstream and downstream

CIF THEORY OF CHANGE

CIF IMPACT

Accelerated transformational change toward net-zero emissions and inclusive, climate-resilient development pathways

and inclusive, climate-resilient development pathways							
	^	. IMP/	ACTS	^			
Reduced or avoided GHG emissions and enhanced carbon sequestration	Strengthened climate resilience of land, people, and physical assets	Transformation of energy, land-use, industrial, social, environmental, and governance systems to align with the Paris Agreement	Improved social and economic development impacts from climate finance	Markets created and deepened with new and additional climate finance and private investments	Disruptive climate technologies and innovative solutions more competitive across sectors and countries		
	^	оитс	OMES	^			
Energy: Increased renewable energy supply, energy access, security, and flexibility via grid and off-grid systems, alongside coal phase-out	Land, Resources, and Assets: Improved sustainability, use, and management of rural and urban lands, resources, and assets, i.e., forests, coasts, agro-systems, cities, industries, and supply/value chains	People: Strength- ened livelihoods, well-being, gender equality, food security, adaptive capacity, and climate engagement, with greater social inclusion and distributional equity	Markets: Signals of more competitive, emerging markets with increased climate ochnancing and attention to environmental, social, and governance (ESG) principles	Policies: Improved climate-responsive governance with policies and regulatory frameworks adopted and implemented	Innovation: Successful piloting climate technologie and innovative solutions		
	^	OUT	PUTS	^			
New investments implemented in renewable energy, clean transport, energy storage and grid integration, off-grid systems, coal phase-out, land and ecosystems, cities, industries, forests, clean technology, and climate resilience		Accelerated climate action by countries, MDBs, institutions, and local stakeholders	Demonstrated inclusivity and systems-level coordination in development activities	Climate-responsive markets and policies supported	Learning, accountability, feedback loops, and innovation fostered		
	^	ACTIV	/ITIES	^			
Diagnostics, roadmaps, and market and system operations Design of system-wide country investment plans Development of coherent, bankable project pipelines			Provision of flexible and innovative climate finance instruments for strategically aligned investments, alongside MDBs' own capital, domestic, and international public/	Bespoke technical assistance, capacity building, policy dialogues, gender mainstreaming, stakeholder engagement, and learning activities	CIF-level program coordination, monitoring, evaluation, and learning, gender, knowledge management, and governance activitie coordinated with		

INPUTS

Country-led, programmatic, participatory approach Capacity for largescale, coherent packages of publicand private-sector Multi-MDB technical expertise and coordinated climate action addressing strategic gaps in

Consideration of systems transformation, gender equality social inclusion, distributional equity, accountability, and learning from the Scaled-up, flexible, and predictable concessional finance new and additional to official development assistance (ODA) resources
