Introduction

The Climate Investment Funds (CIF) were established in 2008 and its financial architecture is rooted in two trust funds. The Clean Technology Fund (CTF) aims to provide scaled-up financing to contribute to the demonstration, deployment, and transfer of low-carbon technologies with a significant potential for long-term greenhouse gas emissions savings. The Strategic Climate Fund (SCF) aims to provide financing to pilot new development approaches or scale-up activities aimed at a specific climate change challenge or sectoral response. The SCF currently finances three such programs: the Forest Investment Program (FIP), Pilot Program for Climate Resilience (PPCR), and Scaling Up Renewable Energy in Low-Income Countries Program (SREP).

The World Bank acts as the Trustee for the CIFs. This report is produced by the Trustee based on financial information as of March 31, 2018, in accordance with the Trustee's role as set forth in the Governance Framework for the SCF which states:

"The Trustee will provide to the SCF Trust Fund Committee, and, to the extent applicable, any SCF Sub-Committee, regular reports on the financial status of the Trust Fund, as agreed between the Trustee and the SCF Trust Fund Committee, or as the case may be the relevant SCF Sub-Committee."

Regular financial reporting is provided through the Trustee's website: www.fiftrustee.worldbank.org. This report has been prepared specifically for the SCF Trust Fund Committee (TFC) to provide: (i) a snapshot of the financial status of the SCF Trust Fund as of March 31, 2018; (ii) the status of pledges and contributions, and (iii) the status of the SCF Programs: FIP, PPCR, SREP and Evaluation and Learning.

d/ The total contribution finalized by the United Kingdom through the SCF is GBP 2.1 billion, which includes allocation of GBP 1130 million to CTF, GBP 3.5 million to Readiness Fund of the Forest

Carbon Partnership Facility (FCPF), GBP 11.5 million to Carbon Fund of the FCPF and GBP 50 million to the Congo Basin Fund.

e/ The total pledge made by the United States to the CTF and SCF is USD 2 billion.

f/ Includes cash receipts and encashed promissory notes.

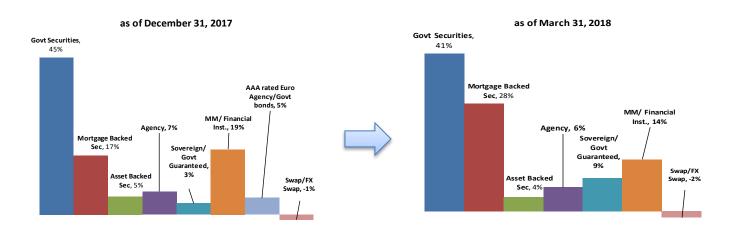

1.2.Asset Mix and Investment Returns and Adjustment for Changes in Market Conditions

The undisbursed cash balance of the SCF Trust Fund is maintained in a commingled investment portfolio ("Pool") for all trust funds managed by IBRD. The Pool is managed actively and conservatively with capital preservation as the over-arching objective.

ASSET MIX

SCF Trust Fund assets are invested across three of the World Bank Trust Fund's investment model portfolios, ("Model Portfolio 0" for short term working capital needs, "Model Portfolio 1" with an investment horizon of one year, and "Model Portfolio 2" with an investment horizon of three years). The latter two model portfolios aim to optimize investment returns subject to capital preservation with a high degree of confidence (based on statistical models) over the respective investment horizon. Although actual future returns will depend on market conditions, the Trust Fund Investment Pool portfolio is actively monitored and adjusted to preserve development partner funds over the investment horizons. Over shorter periods however, market volatility may result in negative actual or 'mark-to-market' returns.

On July 1, 2015, the World Bank formally adopted the Conditional Value-at-Risk (CVaR) measure as the risk constraint in the management of trust funds. Funds are managed such that the expected maximum loss, as measured by the CVaR, at the portfolio's investment horizon, is not to exceed 1% with 99% confidence. The portfolio allocation by asset class has the largest allocations to government securities, money market and mortgage backed securities (MBS).

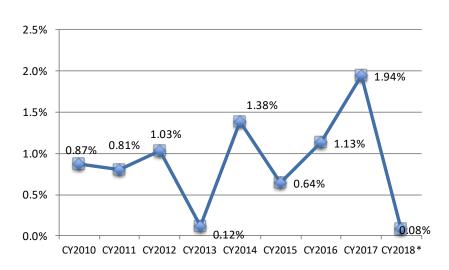

<u>Note:</u> The negative position in swaps is primarily due to changes in foreign currency exchange (FX) rates in cross currency basis swaps. Such swap instruments are used to implement currency hedges on bond positions within the portfolio. These hedges remain in place.

¹ Mark-to-market gains or losses represent unrealized gains or losses resulting from changes in the value of securities in the portfolio which have not yet been sold.

INVESTMENT RETURNS

SCF Trust Fund investment returns were low in early 2018 as global markets experienced a high level of volatility on the back of political and policy uncertainty in the US and geopolitical themes globally. The SCF Trust Fund achieved a-calendar year-to-date 2018 return of 0.08%
