#### Introduction

The Climate Investment Funds (CIF) were established in 2008 and its financial architecture is rooted in two trust funds. The Clean Technology Fund (CTF) aims to provide scaled-up financing to contribute to the demonstration, deployment, and transfer of low-carbon technologies with a significant potential for long-term greenhouse gas emissions savings. The Strategic Climate Fund (SCF) aims to provide financing to pilot new development approaches or scale-up activities aimed at a specific climate change challenge or sectoral response. The SCF currently finances three such programs: the Forest Investment Program (FIP), Pilot Program for Climate Resilience (PPCR), and Scaling Up Renewable Energy in Low-Income Countries Program (SREP).

The World Bank acts as the Trustee for the CIFs. This report is produced by the Trustee based on financial information as of October 31, 2016, in accordance with the Trustee's role as set forth in the Governance Framework for the SCF which states:

"The Trustee will provide to the SCF Trust Fund Committee, and, to the extent applicable, any SCF Sub-Committee, regular reports on the financial status of the Trust Fund, as agreed between the Trustee and the SCF Trust Fund Committee, or as the case may be the relevant SCF Sub-Committee."

This report provides (i) a snapshot of the financial status of the SCF Trust Fund as of October 31, 2016; (ii) the status of pledges and contributions, and (iii) the status of the SCF Programs: FIP, PPCR, SREP and Evaluation and Learning

## 1.2.Asset Mix and Investment Returns and Adjustment for Changes in Market Conditions

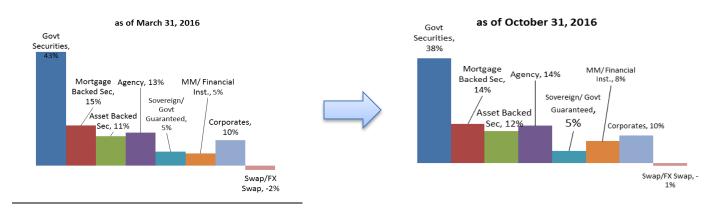

The undisbursed cash balance of the SCF Trust Fund is maintained in a commingled investment portfolio ("Pool") for all trust funds managed by IBRD. The Pool is managed actively and conservatively with capital preservation as the over-arching objective.

#### ASSET MIX

SCF Trust Fund assets are invested across three of the World Bank Trust Fund's investment model portfolios, ("Model Portfolio 0" for short term working capital needs, "Model Portfolio 1" with an investment horizon of one year, and "Model Portofolio 2" with an investment horizon of three years). The latter two model portfolios aim to optimize investment returns subject to capital preservation with a high degree of confidence (based on statistical models) over the respective investment horizon. Although actual future returns will depend on market conditions, the Trust Fund Investment Pool portfolio is actively monitored and adjusted to preserve development partner funds over the investment horizons. Over shorter periods however, market volatility may result in negative actual or 'mark-to-market'<sup>2</sup> returns.

On July 1, 2015, the World Bank formally adopted the Conditional Value-at-Risk (CVaR) measure as the risk constraint in the management of trust funds. Funds are managed such that the expected maximum loss, as measured by the CVaR, at the portfolio's investment horizon, is not to exceed 1% with 99% confidence.

The portfolio allocation by asset class has the largest allocations to government securities, mortgage backed securities (MBS), agency and asset backed securities.

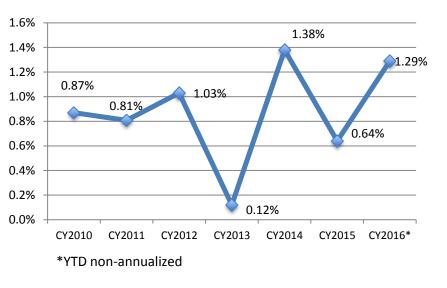

<u>Note:</u> The negative position in swaps is primarily due to changes in foreign currency exchange (FX) rates in cross currency basis swaps. Such swap instruments are used to implement currency hedges on bond positions within the portfolio. These hedges remain in place.

<sup>&</sup>lt;sup>2</sup> Mark-to-market returns or losses represent returns or losses generated through an accounting entry rather than the actual sale of a security.

#### **INVESTMENT RETURNS**

SCF Trust Fund investment returns have been modest for calendar year 2016 with a cumulative return of 1.29% to date. Overall, the SCF Trust Fund cumulative returns have been driven by investment in longer term tranches, which may be exposed to higher volatility in returns over shorter periods. Returns are expected to be low going forward as the risk of rising market yields continues to be elevated, with an adverse effect on total portfolio returns due to lower bond prices.

#### ADJUSTMENTS FOR CHANGES IN MARKET CONDITIONS

As a gradual move to higher rates in the coming years is expected, the outlook for fixed-income investments continues to be for low returns, as increases in market interest rates could result in unrealized (i.e., mark-to-market) losses for fixed income returns in general. Given the challenging environment for fixed income investments, the Trustee has taken steps to reduce the interest rate sensitivity of the Trust Fund Investment Pool portfolio to limit the impact of potential future interest rate increases (known as "duration"). In addition, efforts are underway by the Trustee and CIFAU to enable investments in a broader universe of assets in order to achieve greater diversification of portfolio risks and increase returns. Diversification opportunities include emerging market sovereign bonds, covered bonds and new money market instruments.

#### 1.3. Cumulative Net Commitments

### Total Net Commitments by the Trustee by Activity

As of October 31, 2016, based on the funding approvals by the SCF Trust Fund Committee, or the SCF Sub-Committee as appropriate, the Trustee made net commitments totaling USD 1.84 billion. Of this amount, USD 116 million represents net commitments for administrative budget, including the Country Programming budgets under the relevant SCF Program, and USD 1.72 billion for projects, including preparation grants and MDB costs for project implementation and supervision services (MPIS costs). This is an increase of USD 116 million since April 1, 2016.

## Net Project and Program Commitments by Program

Net commitments made by the Trustee totaled USD 1.72 billion for projects, investment plan preparation and MPIS costs, of which USD 396 million was committed under the FIP, USD 1.035 billion under the PPCR, and USD 290 million under the SREP.
