**Comments from the United Kingdom—Approval by Mail: CTF Turkey: Renewable Energy Integration Project (IBRD)**

Dear Patricia,

The UK is happy to approve this project.

We would like to thank the World Bank team for their swift responses to our questions. We also note the good work of the project developers in using a dynamic baseline to calculate emissions savings and identify the CTF's additionality.

We would also like to complement the reviewer of the project whose thorough work and intelligent questions made our appraisal that much easier. WE would like to see more reviews of this calibre.

In order to ensure the successful integration of these wind developments into Turkey's electricity market in the long term and to strengthen capacity to support continued mitigation of safeguards issues we would encourage the IBRD to find finance for the additional TA.

Kind regards

Simon
