Comments from Sweden—Approval by mail: Ukraine: District Heating Energy Efficiency - IBRD (CTF)

Dear Patricia,

Thank you for circulating the project proposal entitled *Ukraine: District Heating Energy Efficiency*. We welcome the Ukrainian district heating energy efficiency project and believe it has considerable potential in a field where efforts are needed.

In order to undertake efficient projects, coordination with existing efforts is crucial. Similar efforts in the district heating energy efficiency sector are already under way in the Ukraine, not least within the Eastern Europe Energy Efficiency and Environment Partnership (E5P). However, we take note of the lack of discussion on how the CTF project will relate to/complement existing efforts carried out by the E5P and other stakeholders. We would therefore like to request further clarifications on this important matter in order to encourage synergies and avoid duplication of work.

Thank you and best regards,

Linda Nilsson
